

Cultus Lake Park – Cedar Street (North Side) Installation of a Wastewater Forcemain

Please be advised that the Fraser Valley Regional District will be installing a wastewater forcemain (a pressurized pipeline used to convey wastewater where gravity flow is not feasible). Work will take place on the north side of Cedar Street, with construction scheduled to begin the week of April 13, 2026.

FVRD will be undertaking works on the north side of the road (main roadway). The work will include removal and replacement of asphalt and concrete, including (but not limited to) paving stones and related base materials, located outside leaseholder property boundaries.

During construction, access to Cedar Street parking will be restricted on the north side (no entry). Please arrange to park vehicles in the Sunnyside overflow area or another designated parking location.

If parking in other available areas, please ensure your vehicle licence plate number is registered, as required.

The work is anticipated to be completed by April 20, 2026.

Thank you for your patience and cooperation.

If you have any questions, please contact the Cultus Lake Park Office at 604-858-3334.
